

# DBohra Renewable Energy Solutions

Powered by:

# How solar can help individuals, institutions and businesses

Switching to renewable energy can give multiple benefits

**Reduce electricity bills to up to zero**

**Reliable source of power**

**Clean energy with no pollution**

**Incentives and subsidies available for switching**

# Types of solar and how it helps

## On-grid solar

Best when the monthly electricity bills are high

## Off-grid solar

Best for places with frequent power cuts

## Hybrid solar

Gives the benefits of both – on grid and off grid

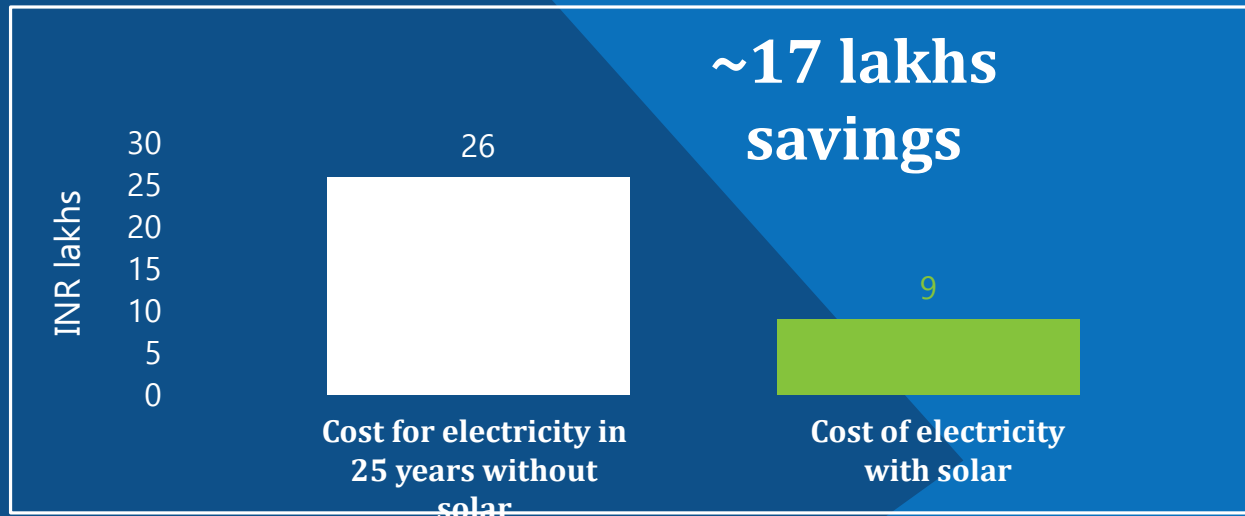

# Renewables now have a high economic value proposition

## Illustration of savings with 6 kW rooftop solar solar system

Initial investment cost:

INR 3-3.5 lakhs

Possible savings in 25 years

Payback on investment (years)

# Challenges for switching to renewable energy

Currently, switching to clean energy is not an easy process

**Lack of awareness  
and unsure of real  
benefits**

**Unaware of good  
quality vendors and  
brands**

**Frequent instances of  
poor-quality  
installations**

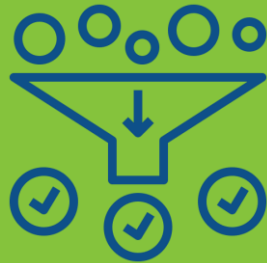

# Community Renewable Energy Platform

A journey to revolutionize how we access and utilize energy, merging our community's deep-rooted values of empathy, awareness, and generosity with cutting-edge clean energy solutions by the community members and for the community members.

# A revolutionary approach to clean energy access

## Key features of the Community Renewable Energy Platform

### Ease of Transition

Identify optimum solution and switch seamlessly

### Quality assured solutions

All solutions offered undergoes stringent quality checks

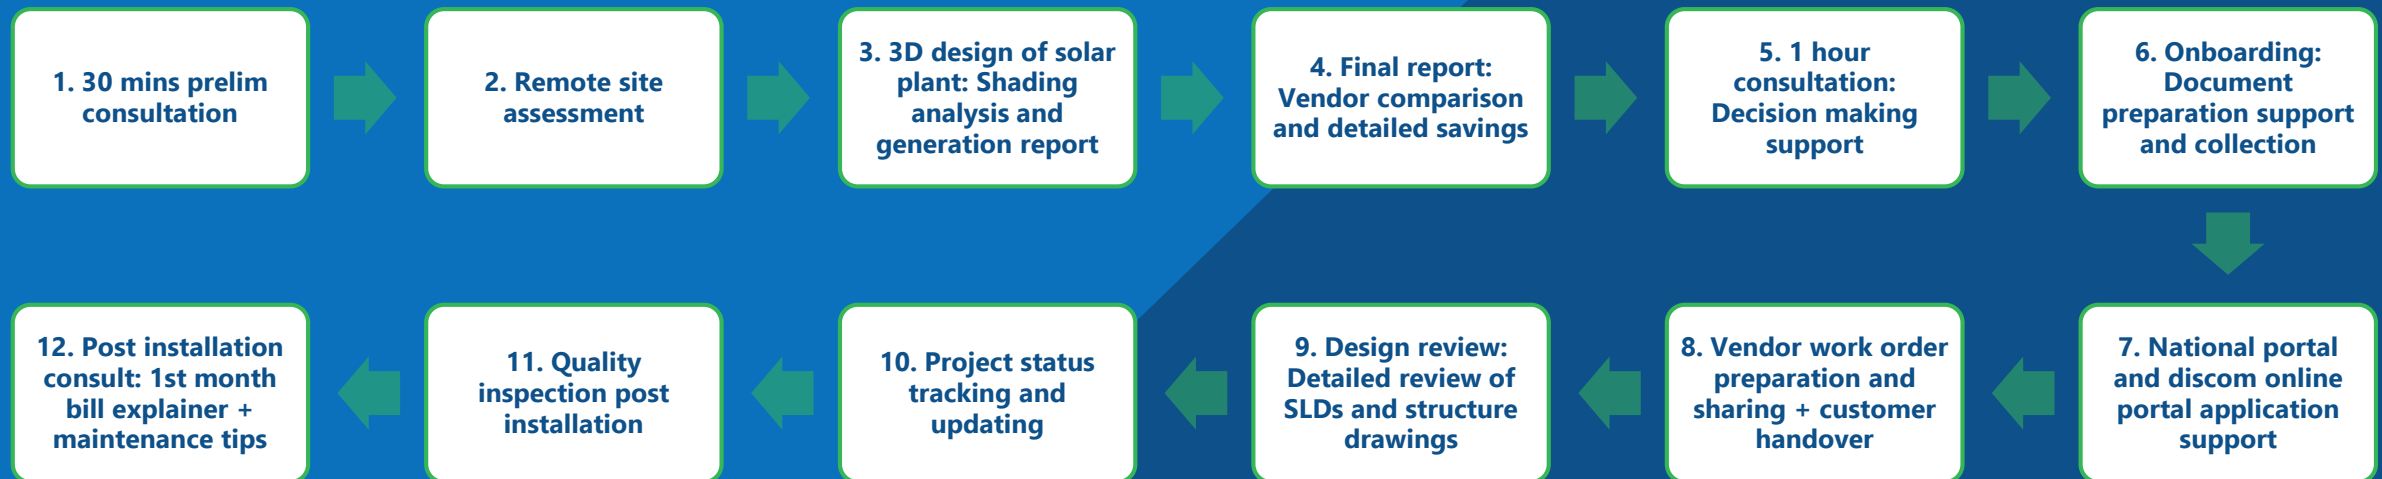

### Access to verified member-owned companies

Onboarding of member-owned companies with extensive verification and checks

# How does it work: Energy Concierge service

Facilitating a worry-free and easy switching to clean energy

# Bringing the renewable energy community closer

## Vendor partnership program

### Vendor Onboarding

- Detailed background checks
- Quality inspections of past sites

### Ongoing Support

- New avenue for business growth with flow of orders facilitated under the program

### Capacity Building

- Support in plant servicing and coordination
- Support in meeting quality standards

# Thank you
