A- OVERVIEW : FRAMEWORK TO ASSESS ECONOMIC GROWTH AND WELL-BEING OF INDIVIDUAL & MAUZE BENEFITTING FROM QARDAN HASANA AND/OR BARAKAT OF HUZURALLA'S(TUS) ZIYAFAT / MAJALIS / QADAM

<u>Quantitative factors and qualitative factors -</u>: By evaluating financial factors (that are measurable), we can develop a good understanding of an individual's economic growth over time.

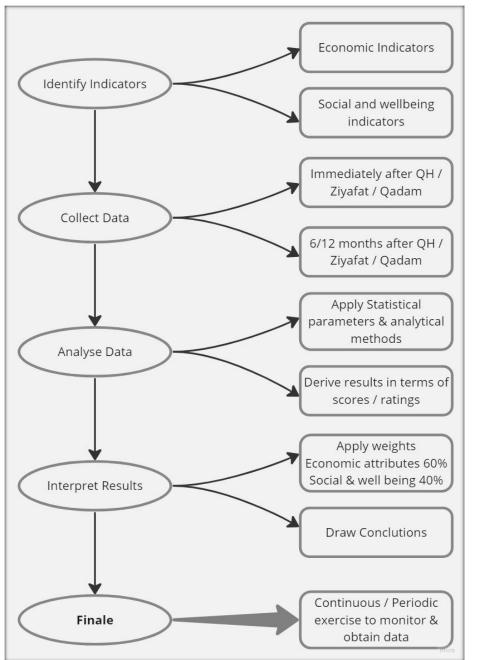

In addition, we also plan to assess an individual's lifestyle growth and other factors that contribute to overall well-being, using combination of self-assessment tools, datasets, interviews, surveys, and observations.

Source of information for the above factors - 1) Documents submitted such as ITRs, Bank statements, financials etc. while requesting QH and comparing the same with current likewise documents 2) Report from OFC who knows ground level reality / details of mumin 3) Data from ITS / tallabulilm on education levels / vocational trainings obtained to enhance knowledge 4) Readily available datasets from Umoor Mawarid Bashariya MIS, Umoor Talimiyah MIS, Umoor Sehat and local Mauzes MIS 5) Evaluation of mumins and his job / business profile thru Market research, online research using social media and report from rating agency 6) Analysing details on Wajebaat growth which reflects barakat and progress of mumin 7) Assessing capacity to take QH and history of repayments, including delays(if any) to understand financial standing

<u>Data collation & index development</u> – In absence of similar data for the base year / past, focusing on trends and relative changes can still offer valuable information about the direction and magnitude of changes in economic growth & wellbeing levels over time.

Comparative analysis can be performed year onwards with first round of figures available.

B – FLOWCHART OUTLINING THE STEPS IN PROCESS

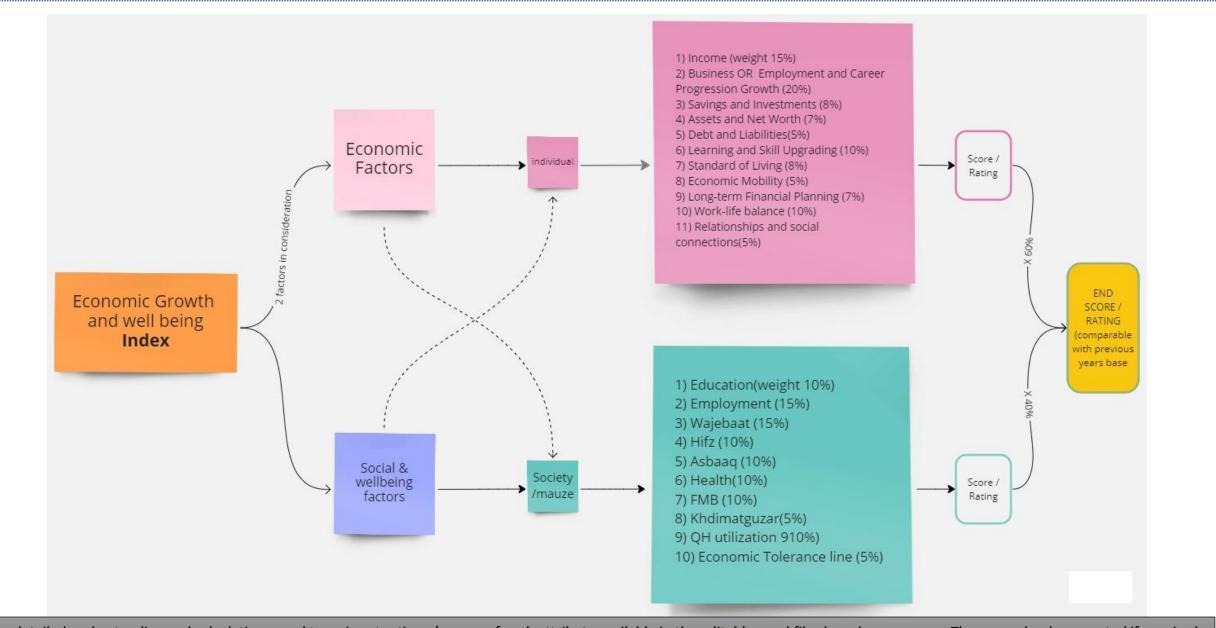

Explanation of the steps:

- 1. *Identify Indicators:* In this step, we need to identify the indicators that are commonly used to measure economic development and individual well-being. These indicators may include income levels, education levels, healthcare access, employment rates, poverty rates, living standards and other relevant factors.
- 2. Collect Data: Once the indicators are identified, data collection takes place. This involves gathering relevant data from various sources, such as Jamat level MIS, Information from various peer Idara, ITS database, surveys, censuses, and other data repositories. The collected data should cover a defined range of individuals and socioeconomic factors.
- 3. *Analyze Data:* In this step, the collected data is analyzed using statistical and analytical methods. This analysis aims to uncover patterns, trends, and correlations within the data. techniques to be considered to extract meaningful insights from the collected data.
- 4. Interpret Results: Evaluate the well-being of individuals based on the analyzed data and interpretations. Consider the impact of economic factors, social factors, and other relevant aspects on the overall well-being of individuals. Interpretation often requires a good understanding of economic theories and social contexts of our community.
- 5. *Finale:* Conclude the measurement process, while keeping in mind that it may need to be repeated periodically to track changes over time and adjust strategies accordingly

Lead for creating this approach and methodology has been derived from various established & accepted indies like :

- Human Development Index
- Gross National Happiness
- Social Progress Index
- Happiness index

C – INDEX DESIGN

For detailed understanding and calculations used to arrive at ratings / scores of each attribute available in the editable excel file shared as annexure. These may be documented if required.

D – ASSESSMENT OF MAUZES ECONOMIC GROWTH & WELLBEING BENEFITTING FROM QARDAN HASANA AND/OR BARAKAT OF HUZURALLA'S(TUS) ZIYAFAT / MAJALIS / QADAM

Assess improvements in housing, access to healthcare, transportation, and other quality-of-life factors.	8.1	1)Is there improvements in housing, access to healthcare, transportation, or other quality-of-life factors	Survey Report	Improvement in housing standards since last 2 years	Yes			4	4	1	100%			
	2.000		8.2	2)Are there any significant changes in mumins lifestyle that indicate economic growth		Can afford / has access to medical requirements	Yes			4	4	^				
9	Economic Mobility	Evaluate whether the individual has moved up the economic ladder over time, especially when compared to their peers or the general population.	9.1	 Assess if mumin has moved up the economic ladder compared to his market peers or the general population 	OFC report	Has mumin grew vis a vis market peers in last 2 years	Yes			5	5	†	100%			
		Assess whether the individual has engaged in	Assess whether the individual has engaged in 10.1	10.1	1)Is mumin feels well-prepared for his future financial needs			I Future planning done and feels reasonable to him?			Yes	4	0	•		
10	Long-term Financial Planning	effective financial planning, such as retirement savings, investments for the future, or insurance coverage.	10.2	2)Is mumin actively working towards achieving his financial goals	Survey Report	Are financial goals set and is there plan developed and progress made towards achieving the same		Yes		з	2.25	⇒	32%			
11	Work-life balance	Consider how the individual manages their work- life balance. Look for improvements in their ability to prioritize and allocate time for work, personal activities, family, and leisure, ensuring a healthy balance between various aspects of life.	11.1	1) Is mumin able to maintain work life balance - assess working hours, leisure plans, steps to maintain health etc.	Survey Report	Is he able to maintain work life balance.? Including spending quality time with family has improved since last 2 years		Yes		10	7.5		75%			
12	Relationships and social	Evaluate the quality and depth of the individual's relationships and social connections. Look for improvements in their ability to build and maintain	12.1	1) Is mumin available for social gatherings, functions, seminars for participation	Survey Report / ITS		Yes			3	3	1	90%			
	connections	meaningful relationships, expand their social network, and develop a supportive social circle.	12.2	2) how developed is the social circle of mumin	database	reach and known in social circle		Yes		2	1.5	⇒>				

F: Notes / Actionable

Various Source of information has been considered for fetching the required information. Information is available with various Umoor bodies which needs to be brought at one place and may require data cleansing. Further, a questionnaire can be designed to seek some information which are subjective and requires answer from the individual

Framework, once approved can be used to populate the report in the form of 1) individual level report 2) Mauze / Jamiyat level report (which will be combine scores of individuals in that mauzes) 3) Country level report that will combine scores of all the Jamiyats.

Actionable :-

- Develop the requirement charter for coordination with various Idaras
- Access to Realtime ITS data repositories to be arranged
- Survey form to be created for Mumin to obtain relevant information required for this exercise
- Other information as listed in the excel annexures to be obtained from Jamaats / OFCs
